

Dear WFOT Members,

The World Federation of Ozone Therapy (WFOT) has successfully completed its presidential handover process. Following this significant transition period, we can now fully focus our attention and energy on our future goals.

One of our top priorities for this new term is to establish standardized education in the field of Medical Ozone Treatment and to organize training programs based on these standards in many parts of the world.

Our aim is to strengthen the scientific foundations of the Medical Ozone Therapy, promote ethical practices, and disseminate knowledge in this field at an international level by creating a comprehensive educational infrastructure and propose a virtual self-regulation in order to maintain the quality of Ozone Treatments at the highest level throughout the world.

To achieve this vision, we greatly need the cooperation and contributions of our esteemed members. Your knowledge, experience, and creative ideas will play a key role in the success of this global standardization process.

In this context, we invite you to share your suggestions with us regarding the establishment and implementation of Medical Ozone education standards in order to contribute to the completion of the Sao Paulo Document with the widest collaboration of all our associates.

We welcome all your ideas and proposals on topics such as educational content, methodologies, accreditation processes, or regional needs.

We also look forward to the participation of all our members in the WFOT General Assembly Meeting, which will take place during the International Ozone Therapy Congress, organized in cooperation with WFOT and EUROCOOP associations in Bucharest from September 25-27, 2025.

www.o3congress.com

With your contributions, we will shape the future of Medical Ozone Treatment and ensure that this valuable therapeutic method reaches a wider audience safely and effectively.

Please send your comments and suggestions to my personal email address (lale@yeprem.com) or to the official WFOT email info@wfoot.org

Dr. Lale YEPREM
President, WFOT 2025-2026
