Gregorio Martinez ISCO3 President

Dear sir,

Despite my previous talk and my personal and family events that do not allow me to actively participate to the ISCO3 activities, I have seen the presence of my name and signature, on a official document released by the society that you are representing. The above together with the fact that I do not agree at all with the second edition of the document entitled "Madrid declaration on ozone therapy" has driven me to present you my irrevocable resignation from my honorary ISCO3 presidency. I hereby confirm my volition to avoid from your side any kind of mention or reference to me inside your advices, documents or website informations.

As you well know I did not fully agree with the first version of "Madrid declaration" document, because, as I said in my interview, it would need revising with a kind of working in progress and it was based also on imaginative ideas and not on precise biochemical data.

Please give me evidence that you have followed all my above instructions, otherwise I will be obliged to act differently.

I look forward to hearing from you as soon as possible.

Regards,
Prof. Velio Bocci
